RESPONSE TO RESTRICTION REQUIREMENT

In the present Office Action, the Examiner has stated that the present Application contains four distinct inventions. Specifically, the Examiner has required Applicant to elect between a first invention, recited in Claims 1-18 in group I, drawn to transmitting position data to a remote server by a vehicle mounted device including short range wireless communication system, classified in class 701, subclass 207; a second invention, recited in Claims 19-25 in group II, drawn to communication system with a set data transmission interval, classified in class 701, subclass 36; a third invention, recited in Claims 26-33 in group III, drawn to communication system with user input configuration at the remote server, classified in class 715, subclass 735; and a fourth invention, recited in Claim 34 in group IV, drawn to communication system with overwrite capability, classified in class 369, subclass 13.16.

The Examiner states that the inventions are distinct because group I and Group II-IV are related as subcombinations disclosed as usable together in a single combination.
